

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday July 24th 1941

CALLAGHAN'S DAM IS POPULAR SWIMMING SPOT

The dam on the farm of Mr. Neil Callaghan was a busy place on Sunday, as many of the people from Chinook and surrounding district drove out to enjoy a cooling dip in the water.

Mr. Callaghan is greatly to be complimented for his kindness in encouraging people to visit the dam, and for the way he has worked to improve the swimming pool's facilities. The installation of a diving board, water chute, and dressing house have made the dam a really pleasant swimming pool.

SMALL WHEAT CROP LIKELY

Prospects for a small wheat crop in Alberta this year, apart from a 40 per cent acreage reduction, were emphasized in crop reports covering the past week.

Generally speaking, rains are needed all over the province to keep crops even near normal. Only in Peace river, where good rains were general, are prospects favorable. Even irrigated districts are very light where water was used late.

The foothills district is hold in on, but will need more moisture.

In the Calgary district rain is badly needed on stubble land crops, but north of the city summerfallow wheat is standing up.

SEEK RECRUITS FOR CONTROL WORK

Details of requirements for men applying as regional control officers, for overseas service have been received at the Royal Canadian Air Force recruiting centre at Calgary. The work of the officers will be connected with communications with aircraft in flight, control of aircraft by radio, and bomber interception work.

Successful applicants will become pilot officers. Preference will be given to men with university training, although the minimum requirement is junior matriculation. Applicants must have good stamina, and be cool-headed in emergencies. Good eyesight is important.

Age limits are between 28 and 40 years of age. Men between the ages of 28 and 32 years who are fit for full flying duties will not be accepted, however.

Full details may be obtained from the R.C.A.F. recruiting centre in Calgary.

SAY BRITISH MORALE IS HIGH

After 3 months in Britain, a great part of it spent with Canadian troops, airmen and sailors, Dr. R. J. Manion is convinced that the morale of the British people is just as high as that of their armed defenders.

Wheat Deliveries*

Producers should carefully study the Government's 1941 Wheat Policy to determine which alternative will bring them the best returns.

It will be necessary for producers who wish to deliver their 1940 crop and collect farm storage to do so before August 1st, 1941, when the 1941 crop delivery quota becomes effective.

THE ALBERTA PACIFIC GRAIN COMPANY, LIMITED (20)

IMPORTANT NOTICE to Men Liable for Military Training

FOR Public Safety, by Proclamation, dated June 27th, 1941 (under authority of The National Resources Mobilization Act 1940 and The War Measures Act), The Governor in Council has now made liable for military training for the defence of Canada—

—all male British subjects resident in Canada at any time since September 1st, 1939, who, on July 15th, 1940, were unmarried, or childless widowers, and who on July 1st, 1940, had reached the ages of

Twenty-one years
Twenty-two years

Twenty-three years
Twenty-four years

*and also men who attained or will attain the age of twenty-one years on or after the first day of July, 1940, and who were on the specified day of July (1940), unmarried or widowers, without child or children."

Extract from Paragraph 3 of Proclamation.

Men designated in the foregoing are further required

"To submit themselves for medical examination and to undergo military training for a period of four months within Canada or the territorial waters thereof, and to report at such places and times and in such manner and to such authorities or persons as may be notified to them respectively by a Divisional Registrar of an Administrative Division."

Extract from Paragraph 4 of Proclamation.

SPECIAL PROVISIONS

designed to facilitate
equitable conditions of mobilization

Deferring of Training Periods to Avoid Individual Hardship

If the Board is satisfied that the calling out of any man for military training will cause extreme hardship to those dependent upon such man, the Board may, from time to time, postpone the training period of the man: Provided that such man shall apply for a postponement order in accordance with the provisions of subsection one of section ten of the regulations.

Postponement Applications Must be Made in Writing

No application for a postponement order may be made otherwise than in writing, by the man called out, to the Divisional Registrar who issued the "Notice—Medical Examination" and within eight clear days of the date appearing on such notice.

Any person who appears before a Board shall do so at his own expense.

War Industry and Seasonal Occupations given Consideration

In the national interest, applications for postponement of training of key men engaged in war industries, or in essential occupations, may be addressed to the Divisional Registrar concerned.

Eligible Men Must Not Leave Canada without Authority

No male British subject who is liable to be called out for military training shall, after his age class has been called out by proclamation, leave Canada, for any reason whatsoever, unless and until he has been so authorized in writing by the Chairman of the Board to whose jurisdiction such man is subject.

Eligible men must notify authorities immediately of change of address or marital status

If you are a single man or childless widower between the ages of 19 and 45 and if you change your address, or if you marry, you must immediately notify

THE NATIONAL WAR SERVICES DIVISIONAL REGISTRAR IN
THE DIVISION IN WHICH YOU ARE REGISTERED

If you do not know the name and address of your Divisional Registrar, ask at your local post office.

Failure to comply with this requirement may subject you to a fine or imprisonment.

CIVIL RE-EMPLOYMENT

Provision has been made for the reinstatement of men in their positions of employment, after their periods of training or service, under conditions that will facilitate their re-entry to civilian life.

Published for the information of those concerned by the authority and courtesy of

THE HONOURABLE JOSEPH T. THORSON,
Minister of National War Services.

Visual War Education

The value of ocular public demonstration and display of Canada's war effort in all its vast ramifications as a stimulus to further effort is only just beginning to be appreciated by the authorities in charge of the greatest single objective in our national history. It is a form of propaganda which is needed to bring home to many people of the country the fact that while much is being done in the fight to preserve liberty much more can be done if only every man can be brought to realize it, and the necessity for it.

The word "propaganda" is used in its best and proper sense, not with the idea of attempting to fool the people into believing something that is not so, but with the intention of uncovering the facts, presenting them in the most easily assimilable form and in such a manner that the people themselves can readily appreciate the implications the facts may convey and draw their own conclusions therefrom. That is the only enduring and effective type of propaganda. That is the sole form in which propaganda will not defeat its own ends. It is missionary work.

Something has already been done in this direction and what has been done is commendable, but the fact that there yet remain citizens of the country who are not yet fully conscious of the imperative nature of the demands for an all-out effort, that there are still some who are willing to concede the necessity for great sacrifices but are not willing to put into practice what they preach, indicates the necessity of more missionary work along the lines indicated.

Value Demonstrated

The interest evinced by the general public in army life as shown by the larger number of people who flocked to the military camps when they were first thrown open to inspection on Army Day gives an inkling of the value of this form of demonstration. It is satisfactory to learn that from time to time similar occasions will be arranged by military districts on the authority of the Department of National Defence.

Major-General B. W. Browne, D.S.O., M.C., Adjutant General, who originated Army Day is quoted as saying: "This first chance for the public to see army personnel on and off parade, to see the complicated war machines, and to examine everyday life of those who have realized their responsibilities of citizenship in a democracy and have freely volunteered to defend that democracy, has developed a keener interest in the men upon whose self-sacrifice Canada must rely if freedom is to prevail."

Major-General Browne would not have gone as far if he had added that this visible demonstration of army life and all that it implies must have had some effect in encouraging those young and able-bodied men who are in a position to offer services and have not yet done so, to face up to their responsibilities and to realize more fully, with the example before them, that they, too, have a duty to a country which has afforded them so many privileges.

In Another Direction

That the value of visible display as a stimulus to the war effort is taking shape in the official mind was evidenced in another direction when the announcement was made that the Department of Munitions and Supply would stage an exhibit at the Canadian National Exhibition in Toronto, August 22 to September 6, in an effort to give visitors to the fair "some conception of the gigantic scope of the Dominion's industrial war effort."

At this exhibit, it is stated, will be seen made-in-Canada heavy infantry and cruiser tanks, field guns, anti-aircraft gun barrels, machine guns, rifles, searchlights, naval craft, Universal carriers, motor trucks, anti-aircraft shells, cartridge cases, fuses and a host of other things which civilians rarely see. Better still, action is to be brought into the picture, as Canadian men and women will be seen actually at work on machines which turn out Bren guns, Lee-Enfield rifles, highly intricate fire control equipment and other essentials of modern warfare. Where demonstrations are impossible, huge photographic enlargements will tell the story of the "battle of the factories."

When one remembers that the Canadian war effort is the greatest activity which is dominating or should dominate the public consciousness it can readily be conceived that this display will greatly outstrip all others in popularity at the National Exhibition, that it will prove to be the greatest drawing card at the fair and that it will leave a deep impress on the minds of all who see it, an impress which should bear fruit in a greater war activity in all branches.

Unfortunately, members of Western Canadians who will have an opportunity of seeing and benefiting from this great display of what the nation is doing to preserve its great heritage of liberty will be very limited. If this exhibit is to achieve the maximum results of which it is capable it should be made a travelling display, so that it may be seen and the lessons it should convey may be learned by westerners in the most graphic form—through the eye.

Let us have more ocular demonstration of the Canadian war effort and let every citizen from the Atlantic to the Pacific have an opportunity of seeing it.

No Match For British

Germany's Blue-Eyed Pilots Do Not See So Well At Night

Germany will lose the war because her people in the main, have blue eyes, according to Dr. Harold R. Sinnerman, president of the New Jersey Optometric Association.

His explanation: "It is a scientific fact that the more pigment in the eye the better the sight at night. Once Hitler's opponents can match plane for plane and the various other weapons that are used under the cover of darkness, the human element behind these mechanical tangibles will become the deciding factor, and Hitler's inferior and lightly pigmented night operators will be no match for the sharp-shooting British and other more deeply pigmented peoples."

All Have A Value

British Post Office Receiving Stamps Damaged By Nazi Bombs

The British Post Office is getting returned hundreds of stamps made unfit by incendiary bombs or burned under wreckage. Many stamps have been recovered from bombed buildings, and in nearly all of them were sheets of stamps. Heat had melted the gum and joined sheets in compact boards, but experts at headquarters could usually separate the stamps and assess the value, reports the London Sunday Dispatch. A commission of five per cent. is charged on the face value of the stamps re-purchased. Inland revenue, insurance, and entertainment duty stamps, medicinal labels and playing card wrappers have also been found. "All have a value."

Dead were sometimes buried in graves 50 to 60 feet deep in the South American countries of Colombia and Ecuador.

Oliver Cromwell, in 1650, sent a group of Scottish prisoners, captured in the Battle of Dunbar, to Saugus, Mass., to work in the iron works.

Texas is the leading producer of cotton.

This Canadian Was Lucky

English Girl Gave Him Enough Coupons For Running Shoes

"One doesn't always expect a return for what one gives." In that simple, honest sentence a breathless English girl, standing on a busy street corner at midday, epitomized the British people's philosophy of wartime sacrifice and their boundless generosity to Canadians overseas.

For nine months as war correspondent with the Canadian forces I've puzzled over an expression or a phrase adequate to explain this generosity, only to be told in ten words by this fair-haired stenographer in a little incident in a Southern England town.

I had tried to buy a pair of running shoes, but couldn't get them because, living with the army, I had no civilian clothes. Under the new clothing ration, purchase of a pair of these shoes required seven margarine coupons.

I left the shop, and a block away the girl caught up with me, out of breath with her run from the store, where she had been shopping and overheard the shopkeeper refuse me the shoes.

"You can get those shoes, really you can," she exclaimed. "I'll get you some ration coupons, I'll get some of my father's."

She looked at the "Canada" badges on my uniform. "You're a Canadian, aren't you?"

I stood there baffled by this sudden kindness from a complete stranger, mumbled my thanks and something about being unable to return the price tag that worry you at all," she replied, and added almost apologetically: "One doesn't always expect a return for what one gives."

Then, as if to make the offer more plausible, she said: "I have an aunt in Canada, you know. In Toronto." She walked back to the store. She handed the shoe merchant the coupons and I got the shoes. Her name: Miss Muriel Bennett. Her aunt: Miss Florence Bushell, a friend of Hon. Vincent Massey, Canadian High Commissioner in London. Mrs. Bushell aided in evacuating some British children to Canada and now lives in Toronto.

SELECTED RECIPES

APRICOT UPSIDE DOWN CAKE

1 1/4 cups sifted cake flour
1 1/4 teaspoons double-acting baking powder
1/4 teaspoon salt
4 tablespoons butter or other shortening
4 tablespoons butter
3/4 cup granulated sugar
2 eggs well beaten
1/2 cup milk
1 teaspoon vanilla
1/2 cup brown sugar, firmly packed
12 cooked apricots
Sift flour once, measure, add baking powder and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs, then sift alternately with milk, a small amount at a time. Beat after each addition until smooth. Add vanilla.

Melt 4 tablespoons butter in 8-inch iron skillet, or in cake pan, 8x8x2 inches. Add brown sugar. Stir until melted. On this arrange apricots, cut-side up. Pour batter over contents of pan. Bake in moderate oven (350 degrees F.) 50 minutes, or until done. Loosen cake from sides and bottom of pan with spatula. Serve upside down on dish with apricots on top.

A Fearless Commander

Soviet Pilot Steered Flaming Plane Into Enemy Fuel Tanks

A Russian statement reported that a Soviet pilot, crashed his flaming plane into German gasoline tank trucks in an explosive suicide climax to an encounter at the front. A shell from a German anti-aircraft gun was said to have hit the gasoline tank of the Russian plane, piloted by Capt. Gastelo, commander of an air squadron. "The fearless commander piloted his plane, enveloped in flames, into a concentration of enemy motor cars and fuel tank cars," the account said. "Dozens of German cars and tank cars exploded, together with the hero's plane."

The Mosquito Pest

Suggested Ways Of Dealing With This Torturer And Assassin

Mosquitoes are the tormentors of the insect world, with nightly incursions of torture. They cause much suffering in summer and some species are highly dangerous because they transmit malarial disease and other ills. Do not allow water to stand in roof gutters or drain pipes, as mosquitoes breed in stagnant pools. The old-time rain barrel is more romantic than sanitary.

The eggs of many common mosquitoes are laid in small rafts consisting of several hundred eggs standing on end. Eggs of malarial and yellow fever mosquitoes are deposited singly and float about on the water. The mosquito larvae are the familiar "wigglers" often seen on the surface of quiet water. The larvae breathe through full grown and pass into the pupal stage. The pupae swim about in the water and are sometimes called "tumblers." After a short period the skin of the pupae splits and the adult mosquitoes emerge, spread their wings and fly. The species progress through a number of generations each year.

When the presence of mosquitoes in the bedroom precludes untroubled rest, spray the room before retiring, following the same procedure as that suggested for getting rid of flies. The mosquito, like the fly and some other insects, breathes through pores along each side of its body and must be enveloped in the spray for efficient results. The pyrethrum commonly used in household sprays paralyzes the nervous system and brings about death.

Mosquitoes make the porch uninhabitable or spoil your fun on a picnic, spray your shoes, the back of your neck and your clothing lightly, and the mosquitoes will leave you alone for some time. At lawn parties, good results have been obtained by spraying the legs of tables with paper and spraying this covering with insecticide. Modern household sprays also kill spiders, thousand-leggers, wasps, ants and other insects that may disturb outdoor meals.

Join Air Force

Two Great Grandsons Of Brigham Young Are Doing Their Bit

Two great grandsons of Brigham Young, famous western American pioneer leader and founder of the state of Utah are to "do their bit" with the Royal Air Force in Britain.

Hugh Card Brown of Glendale, Calif., son of Hugh E. Brown, former Lethbridge lawyer, has qualified for pilot duties by taking advanced training in the United States air arm and also a special R.A.F. flying course in California during the past three months. He left recently for Ottawa and expects to proceed overseas.

Lester C. Card, son of Joseph Y. Card of Cardston, is already in England as a wireless operator on a bomber plane.

A Different Pawnshop

Buenos Aires Has Only One But It Is Unusual

The Municipal Bank of Loans is the only pawnshop in Buenos Aires. If a woman pawns her sewing machine and can prove that it is her means of livelihood she may have it back for nothing, only once a year. Some 4,000 women annually pawn their machines just before the return date is due. The following week they get them back, and the entire transaction is carried on without tongue in cheek on either side.—Maclean's Magazine.

British Airman's Hard Luck

Broke His Leg In Simple Accident After Thrilling Escape

Flying over Germany a British airman had his machine practically wrecked by shellfire, but he managed to stagger it home to England. It started to come apart, and he baled out in the dark and floated to safety in a country garden landing unhurt. Then he started to walk to the house—tripped over a croquet hoop, and broke his leg.

That's How She Felt

A plump but very irascible old lady, who lived by herself, was put out when her neighbors arranged a big picnic and failed to invite her. On the morning of the event, the picknickers related and asked the old lady to join them.

"It's too late," she snapped. "I've already prayed for rain."

Service Resumed
Money order service has been resumed between Canada and Iceland and Canada and French India through the British postal administration, a post office department announcement said at Ottawa.

Prophecy Was Correct

Clemenceau Said Germans Would Cause Trouble Under A New Leader

"The Germans," said Clemenceau, "cannot be trusted. They are always the same, and always will be. They will always have someone at their head who will lead them astray for they must be led. That is their nature. Ten years ago it was the Kaiser; ten years from now it will be somebody else. Even if as a race they are all right, which I do not believe, then the rest of the world must unite in saving them from the men they select as leaders."

"The Versailles Treaty is endeavoring to do that. If it fails, it will do so for one of two reasons: either it was not severe enough, or else the rest of the world will relax and not continue to impose its obligations. I am too old to see the fulfillment of my prophecy. I do not know if you will, but I know what I am saying will come to pass."

Seize Perfumery Oils

French Consignment Is Halted At Bermuda

Seizure of \$120,000 worth of rare French perfume oils by the British authorities when the American export liner Excambion stopped at Bermuda was disclosed with the ship's arrival at Jersey City.

The flower essences were taken from Henri Robert who had packed them in his personal luggage for delivery to the American firm of Coty, Inc.

The British Consulate General, Seized said the oils probably were offered because they originated in occupied France, which is under British blockade, and because they were not accompanied by a British export permit. The spokesman added that the British authorities presumed that purchase of any material in a Nazi-controlled area would help the Nazis economically.

British Planos

Trade Has Increased Since The Advent Of The Radio

A few years ago, at the height of the wireless and gramophone entertainment boom, doubts were expressed by some serious musically minded persons whether there would continue to be any incentive or desire among the younger generation to learn to play a musical instrument unless they were adopting music as a profession.

Such fears were not shared by the piano trade, which has always maintained a steady output, though in Britain, like so many other industries, it has had to face severe competition in overseas markets from Germany.

Actually trade in musical instruments has increased rather than declined since the advent of radio, and some British piano firms are now selling more instruments to the Dominions than they were before the war.—London Times.

Their Favorite Music

Austrian And German Composers Choice Of British People

Newsweek says the London Philharmonic orchestra recently completed a tour of Britain's provinces, playing one-night stands in motion picture and vaudeville houses, and is now, for the first time in its life, playing in popular London music halls. The orchestra has found that the two favorite composers are the Germans, Beethoven and Brahms, and the third is the Austrian, Mozart.

Prefabricated Houses

Seven-Room Dwellings Can Be Built In Nine Hours

A seven-room dwelling built in nine hours and costing about \$1,500 may be the first link in a country-wide chain of prefabricated houses designed to meet Canada's wartime shortage of living accommodation for industrial workers, officials of the Dominion housing administration said.

Result of studies conducted by Housing Administrator F. W. Nicolls and his colleagues, the model unit was constructed at a lumber plant at Ottawa. It is made of standard building materials, all procurable on the Canadian market, and can be dismantled. The latest in plumbing and lighting facilities go with the house.

The model house is a one-story dwelling and has two bedrooms, dining room, living room, kitchen, bathroom and furnace room, making 576 square feet of living space. Floor, ceiling and roof are fitted in 12 separate sections each and the walls in 24 parts.

A Charming Gift

Queen Elizabeth, visiting the offices of the lord mayor's fund for air raid victims, saw an embroidered quilt bearing the names of 600 Canadian children and told the lord mayor she thought it a charming gift. With the quilt the fund received \$60, the result of the children paying 10 cents for the privilege of embroidering their names on it.

Trees Moved 82 Miles

A 52-foot elm tree weighing 85 tons was trucked 82 miles from East Gloucester to West Newbury at a cost of \$400 to fill a vacant space in the landscape of Mrs. William Dickie's estate at Gloucester, Mass.

The albatross is the largest of all sea birds. It has a wingspread of 12 feet.

SEEDTIME and HARVEST
By Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevators Association
Demonstration Plots

Two weeks ago, in this column, the importance of regular visits to experimental farms and stations was stressed. Farmers and others unable to visit government institutions or to spend time enough to become familiar with various crops and varieties will be interested in the plots now being grown by grain buyers of elevator companies associated with this department.

Three hundred and sixty plots, each containing either 40 or 50 varieties, have been sown and are being maintained by grain buyers in the three prairie provinces. The plots with 40 varieties consist of annual crops only. Those with 50 contain, in addition to annual crops, alfalfa, sweet clover, brome grass, crested wheat grass, etc.

In order to secure the greatest profit from crops, it is necessary to grow pure stocks of approved varieties. It is impossible to do this without first becoming familiar with the characteristics and adaptations of all varieties likely to be found as crops or as mixtures. In addition to small grains and well-known forage crops, varieties of corn, sorghum, sunflowers and soy beans have been included. Literature dealing with the characteristics of all varieties may be obtained from the buyers in charge or from this office. These plots will have a special appeal for school classes and junior clubs.

A large green sign beside the road is an invitation to improve your knowledge of farm crops. If you do not know where to find the nearest plot, enquire from the Agricultural Department, The North-West Line Elevators Association, Winnipeg, Manitoba.

"CALLING ALL CARS"

Save Gasoline

A NATIONAL EMERGENCY

Canada is right up against an acute shortage of gasoline and fuel oil. Tankers that normally supply our country have been commandeered for vitally important overseas service.

The Commonwealth Air Training Plan, the rapid development of Canada's mechanized army units and the great work carried on by our corvettes make the demand for fuel urgent.

Our crude oil intake is limited. There is just one thing to do if our fighting forces are to carry on with a "full tank". Every Canadian motorist is asked to cut his daily gas consumption in half!

There are many ways by which this 50% saving can be made... ways and means to give you more mileage per gallon. You can drive slower so that you will use less gasoline. You can go fifty-fifty with your neighbours, inviting each other to share cars... for business, and for pleasure. People can readily go to and from work together, using one car instead of four... using one gallon of gasoline instead of several. Women as well as men can make these savings.

The amount of gasoline used in Canada for business, social and non-essential activities is amazingly high in proportion to that used by our fighting forces. One look at the figures would convince you that this situation must be reversed.

Canada does not ask or request you to put your car up. She merely asks for your help... asks that you walk sometimes when the distance isn't too great...

that you take a shorter drive on Sunday afternoon... that you look after your car and keep it in good condition... that you say to your neighbour: "Let's use my car today, Jim; we'll use yours tomorrow."

Every day, in greater and greater quantity, we must release gasoline and oil by the thousands of gallons to our throbbing munitions plants... to our tanks and armoured cars... to our fighting planes and bombers... to our corvettes and merchant ships that ply the vital sea-lanes... so that the day of victory may sooner be at hand.

Will YOU help?

It is also vitally important that you reduce the use of domestic and commercial fuel oil.

17 easy ways towards a
**50% GASOLINE
SAVING**

(Approved by Automobile Experts)

Reduce driving speed from 50 to 40 on the open road.

Avoid jack-knifing starts.

Avoid useless or non-essential driving.

Turn motor off when not in use, do not leave idling.

Don't race your engine; let it warm up slowly.

Don't strain your engine; change gears.

Keep carburetor cleaned and properly adjusted.

Tune up motor, timing, etc.

Check cooling system; overheating wastes gasoline.

Maintain tires at right pressure.

Lubricate efficiently; worn engines waste gasoline.

Drive in groups to and from work, using cars alternate days.

For golf, picnics and other outings, use one car instead of four.

Take these short shopping trips ON FOOT and carry parcels home.

Walk to and from the movies.

Boat owners, too, can help by reducing speed.

Your regular service station man will gladly explain these and other ways of saving gasoline. Consult him.
